

Ergonomic Support

Our task chairs are designed around ergonomic principles and offer intuitive adjustments that help align the body, encourage movement and maintain comfort during long working sessions.

Responsibly Sourced

While most of our products are made locally, some of our ranges, such as Bestuhl task chairs, are crafted in South Korea, where the manufacturing standards, innovation and engineering behind them are best-in-class. We take a considered, transparent approach to sourcing. Every partner we work with is chosen for their commitment to quality, responsible production and compliance with strict regulations.

Optional Upgrades

Some of our task chairs can be tailored with a range of optional upgrades as well as custom upholstery on the seat pad to align with any project’s needs. To see all possibilities, please refer to the price list.

Warranty & Servicing

Our chair warranty and maintenance programme keeps your seating safe, functional, and cost-effective throughout its lifecycle. From annual audits to spare parts, we help you maximise your investment while minimising environmental impact. See [this](#) document for details.

Need guidance?

If you’d like advice on selecting finishes, matching materials, or specifying for a project, please contact your Workstories sales representative or email info@workstories.com for support.

The M1 Task Chair

The M1 chair, simply effortless, body-responsive recline in a chair designed for every body, with value that makes it the smartest choice in the room.

Designed for the full spectrum of today’s office demographics, it removes the need for constant fiddling or fine-tuning; its smart mechanisms do the thinking so you can get straight to work. Adjustments are intuitive, quick and minimal, giving you personalised support without the complexity. With a specification that outperforms its price point, M1 brings together thoughtful ergonomics, clean design and exceptional value, making it one of the smartest choices in any workspace.

Certifications

ANSI/BIFMA X5.1 certified, Materials meet or exceed ANSI/BIFMA M7.1 VOC emissions standards for office furniture.

Bestuhl guarantees limited carbon footprint and is a full member of FIRA, and holds ISO9001 and ISO14001 certifications.

Dimensions

Features

01 Double adjustable lumbar support

The lumbar support lets you fine-tune comfort with two simple sliding controls, giving you the exact level of tension and support your back needs.

02 Auto-Adjusting Tilting Mechanism

The weight-responsive tilt automatically adjusts the tilt resistance based on the user's weight. The tilting angle can be adjusted in 4-stage, allowing you to set it according to your work mode.

03 Seat Depth Adjustment

The seat depth can be adjusted through the button at the lower right corner (50 mm)

04 Adjustable armrest 2D

The backrest pad can be moved vertically to adjust the height, while the lumbar levers on both sides allow for 3-stage depth adjustment in both left and right directions.

Height Adjustment (40 mm)
Depth Adjustment (10 mm)
